

VIBE CODING FOR TEST SCRIPT

Ask Mode:

Read my entire workspace and confirm me what are the files will be impacted if I want to add a checkbox near page class similar to it, to create the testscript for the selected programming language and on selecting that checkbox should create the entire script and visible after clicking on generate button

Agent Mode:

Go to panel.html and Add <label> with checkbox for "Create Test Script" near the Page Class checkbox

Checkbox properties:

name="javaGenerationMode"

id="javaGenModeTestScript"

value="TEST_SCRIPT"

Go to chat.js and Add check for isTestScriptChecked = checkboxes.some(box => box.value === 'TEST_SCRIPT')

Add new conditional branches in getPromptKeys() to handle TEST_SCRIPT combinations:

TEST_SCRIPT + FEATURE + PAGE

TEST_SCRIPT + FEATURE

TEST_SCRIPT + PAGE

TEST_SCRIPT alone

Each combination should return appropriate prompt keys for each language/engine combo

Default behavior when TEST_SCRIPT is checked alone

Prompt.js

Add new prompt templates in the DEFAULT_PROMPTS object for test script generation:

New Prompt Keys Needed:

TEST_SCRIPT_SELENIUM_JAVA — Complete test class with main() method

TEST_SCRIPT_SELENIUM_PYTHON — Complete Python test file

TEST_SCRIPT_PLAYWRIGHT_TS — Complete Playwright test file with test runner

TEST_SCRIPT_CSHARP_SELENIUM — Complete C# NUnit/MSTest test file

Optionally: combined prompts if TEST_SCRIPT is selected with FEATURE/PAGE

Each prompt should:

Include imports and test framework setup

Contain complete test methods (not just POM)

Include assertions and validations

Include test data/examples

Be executable without additional files

User selects TEST_SCRIPT checkbox
