

Testcase Generation Tool

Prompt:

Context

You are an AI Assistant HELPING IN DEVELOPING A HTML UI

INSTRUCTIONS

1. [MANDATORY] Create a fully functional, responsive, single-page HTML application for generating software test cases from user stories using an AI powered one.
2. [MANDATORY] Design a modern and professional user interface using a Blue and Black theme with clean typography, rounded corners, subtle shadows, and responsive layouts.
3. [MANDATORY] Add a dedicated "How to Use" section containing clear step-by-step instructions:
 - * Copy a sample user story.
 - * Paste it into the AI chatbot.
 - * Submit the request.
 - * Review the generated test cases.
 - * Copy the generated output for reuse.
4. [MANDATORY] Create a "Sample Banking User Stories" section containing multiple realistic banking user stories.
5. [MANDATORY] Provide a one-click "Copy" button for every sample user story in the right corner of it.
6. [CRITICAL] Embed the Langflow chat interface for Testcase generation at top right with proper css styling and also proper alignment

```
<script src="https://cdn.jsdelivr.net/gh/langflow-ai/langflow-embedded-chat@main/dist/build/static/js/bundle.min.js"></script>
```

with host_url,flow_id and API Key
7. [CRITICAL] The Langflow chat interface must:
 - * Be directly visible on page load.
 - * Not display any settings menu.

- * Not display any floating launcher icon.
- * Serve as the primary area for AI-powered test case generation.
- * Be styled and aligned professionally within the page layout.

8. [MANDATORY] Add chat utility controls on left panel:

- * Copy Output button
- * Clear Chat button
- * Reset Conversation button
- * User-friendly success notifications

9. [MANDATORY] Implement proper scrolling behavior:

- * Vertical scrollbars for chat conversations.
- * Scrollable sample user story section.
- * Smooth scrolling experience throughout the page.

10. [MANDATORY] Create separate sections for:

- * Application Header
- * User Instructions
- * Sample Banking User Stories
- * AI Test Case Generator Chat Panel
- * Footer

11. [MANDATORY] Use only:

- * HTML
- * CSS
- * JavaScript

12. [MANDATORY] Keep all code within a single HTML file.

13. [MANDATORY] Do not use:

- * React
- * Angular
- * Vue
- * Bootstrap
- * Tailwind
- * Any external UI libraries

14. [MANDATORY] Ensure the page is production-ready and visually appealing.

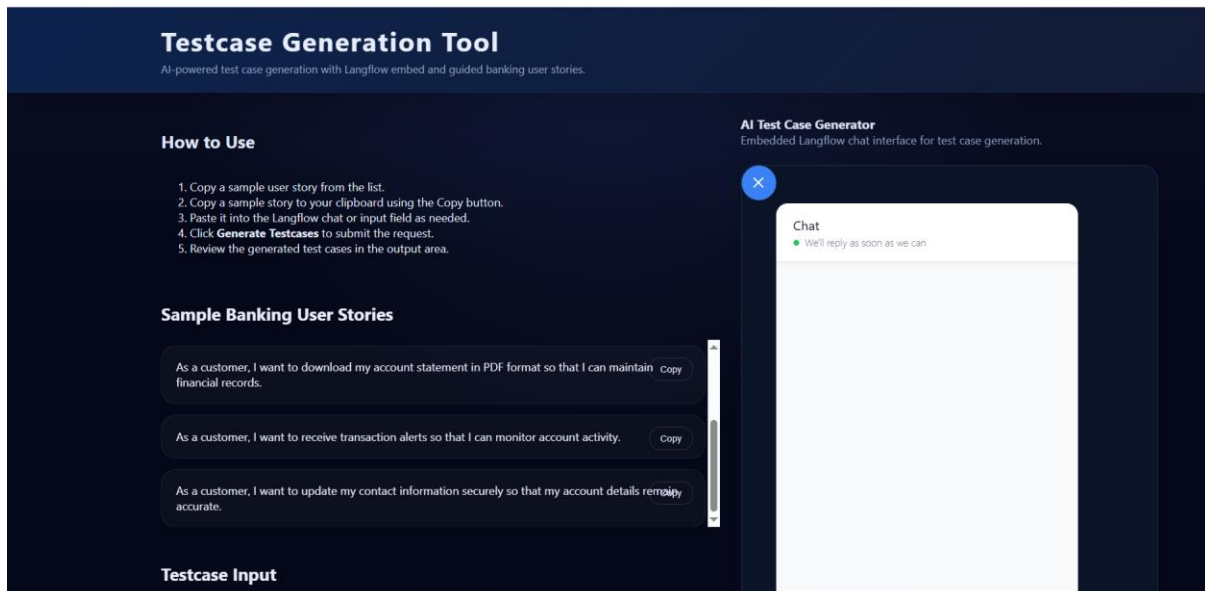

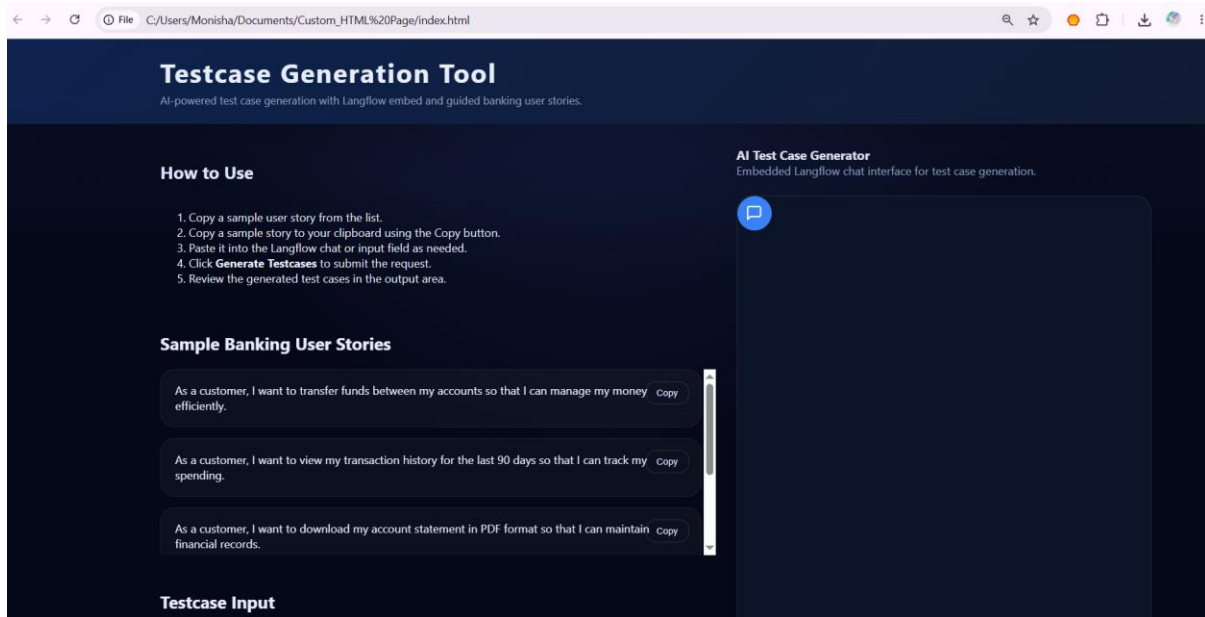

Example:

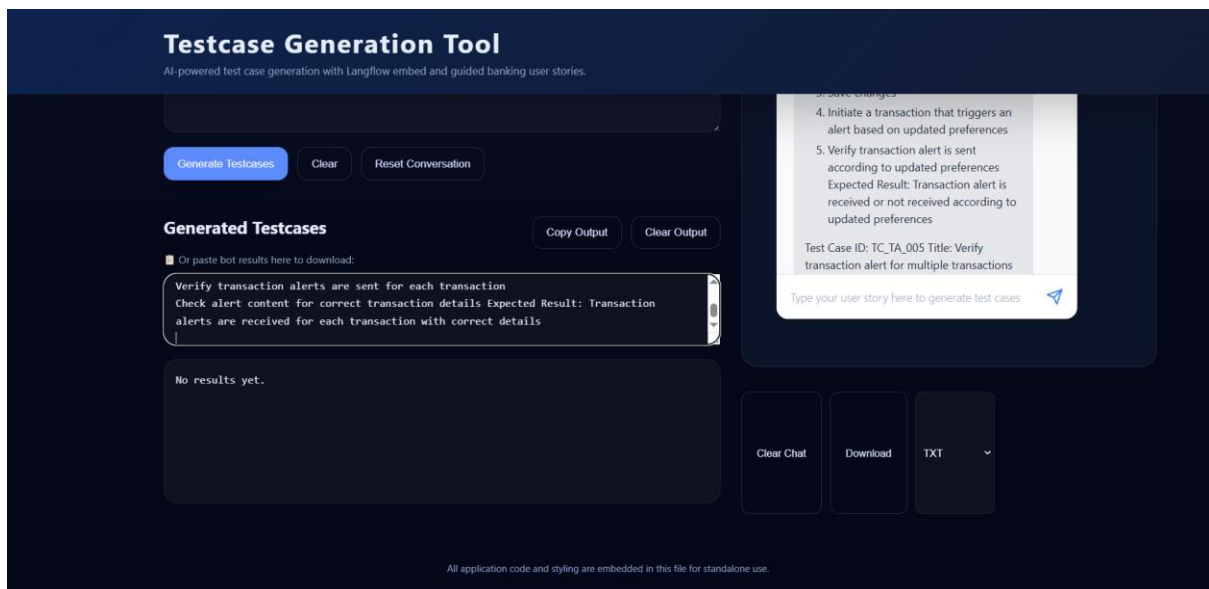

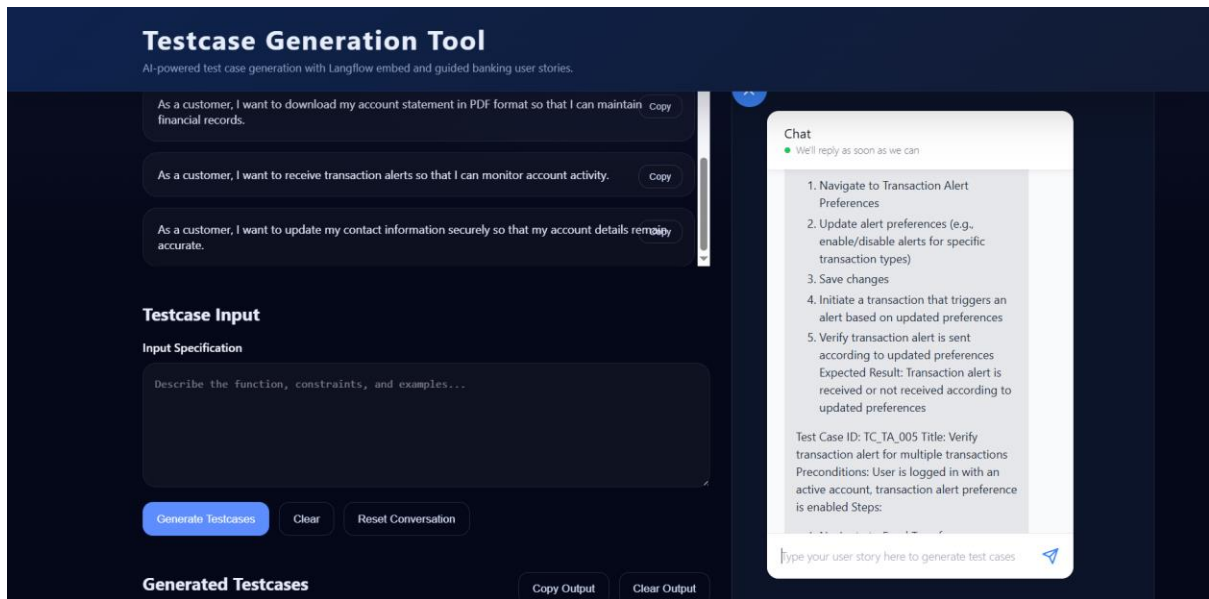

Sample Banking Domain User Stories to include:

- * As a customer, I want to transfer funds between my accounts so that I can manage my money efficiently.
- * As a customer, I want to view my transaction history for the last 90 days so that I can track my spending.
- * As a customer, I want to download my account statement in PDF format so that I can maintain financial records.
- * As a customer, I want to receive transaction alerts so that I can monitor account activity.
- * As a customer, I want to update my contact information securely so that my account details remain accurate.

OUTPUT REQUIREMENTS

1. Generate a complete standalone HTML document.
2. Include embedded CSS and JavaScript.
3. Include Langflow embed configuration.
4. Include all UI sections and functionality.
5. Ensure professional enterprise-grade styling.
6. No external dependencies except the Langflow CDN script.
7. Deliver the entire implementation in a single HTML file.

Testcase Generation Tool

AI-powered test case generation with Langflow embed and guided banking user stories.

```
testcases-2026-06-09T13-17-57-551Z - Notepad
File Edit Format View Help
